Early Pears

BARTLETT. Large; yellow, with a soft blush on the sunny side; flesh white, exceedingly fine grained and buttery; sweet, very juicy with a highly perfumed, vinous flavor. Tree bears early and well. July and Aug.

CLAPP'S FAVORITE. Resembles the Bartlett in appearance, but ripens a week or 10 days earlier; one of the best.

EARLY HARVEST. Tree is a very thrifty grower and a good bearer. The earliest of the large Pears; a month earlier than Clapp's or Bartlett. Fruit not especially good.

KOONCE. Tree a vigorous grower and a heavy and annual bearer. One of the earliest Pears of any size.

Summer and Autumn Pears

ANGOULEME (Duchesse d'Angouleme). Very large, dull greenish yellow, streaked and spotted with russet; flesh white, buttery and very juicy, with a rich and very excellent flavor. The large size and fine appearance of this fruit makes it a geueral favorite. Should be planted as a dwarf. September to November.

SECKEL. Small, skin brownish green at first becoming dull yellowish brown with a lively russet red cheek; flesh whitish, buttery, very juicy and melting with a peculiarly rich, spicy flavor and aroma. August and September.

LE CONTE. Fruit large, pyriform; skin smooth. Tree of remarkable vigor, rapid growth, foliage luxuriant, has so far been nearly free from blight. Quality variable, ripens few days before Bartlett. Grown only as a standard.

GARBER'S HYBRID. Tree an upright grower, with heavy, dark green, glittering foliage which is nearly or quite free from blight; fruit as yellow as an orauge; larger than Kieffer, better in quality and 4 weeks earlier. September.

JAPAN GOLDEN RUSSET. The tree is a luxuriant grower with an abundance of thick, tough, leathery foliage, enabling it to endure great heat and drought without injury. It is an extremely early bearer and bears enormously every year. Ripens in September.
